DETAILED ACTION

1. Prosecution on the merits of this application is reopened on claim 7 considered unpatentable for the reasons indicated below: upon further review of the case, it was also found that a 102(b) rejection over Kaspersen is deemed necessary.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 7 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kaspersen *et al.* {Journal of Label. comp. and Radiopharm., 27, No. 9, 1055 (1989)}. Kaspersen *et al.* teaches the multi-step synthesis of Org-3770 (mirtazapine) on page 1058 (Fig.4). On page 1066, Kaspersen *et al.* teaches the synthesis of mirtazapine and the crystallization of the mirtazapine (compound **1c**) from the crude product using methanol/water solvent mixture to achieve colorless crystals. Compound **1c** is ¹³carbon labeled product, but since the claim embraces the labeled compounds, the crystals product acquired from this process are identical to the claimed crystals of mirtazapine. The synthesis of compound **1d** on page 1067 also can be used as an additional prior art, even though Kaspersen *et al.* did not provide any information on the

Art Unit: 1624

specific nature of the product (solid, crystal, or oily). Since compound **1c** and **1d** are the same compounds, therefore compound **1d** is also presumed to be crystal. These products (crystals from compound **1c**) including compound **1d**, are exactly the same compounds (crystals of mirtazapine) claimed by the applicants.

In order to overcome this rejection, applicants have to replicate Kaspersen's and show that their product is different.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kahsay Habte, Ph. D. whose telephone number is (703) 308-4717. The examiner can normally be reached on M-F (9.00AM- 5:30PM).
